

Hi there!

As a volunteer for the Informed Trauma Care Network, representing the Department of Juvenile Justice in Circuit 13, I met with various church leaders, community centers, and homeless agencies who expressed interest and prayers to engage Trauma-Informed Care goals to emphasize core values to enhance safety, trustworthiness, collaboration, and empowerment via activities designated to develop workgroups, with youth, parent involvement, staff and consumer representatives to coordinate the change process.

I'm interested in interactive activities designed to stimulate ideas and priorities for systemic change with implementing Informed Trauma Care to enhance community participation, unite individuals who want to increase active participation in communities via developing various activities with youth who expressed interests in developing workgroups, fund raiser activities via recreation i.e., aerobics, exercising, jump rope - double Dutch, step, baseball, football, basketball tournaments, drama, poetry and dance.

Such dynamic functions leads to the recruitment of volunteer mentors who are interested in solicitation from various contributors, to fund youth involvement interests in systemic change implementing Informed Trauma Care to reduce recidivism.
